Abstract (en)
[origin: WO2022214260A1] A dial for a watch, in particular a wristwatch, comprises a disk (1) having a surface on which information (3, 4, 5) is arranged. Some of the information (5) is transparent, said transparent information (5) being visible or at least nearly invisible according to the viewing angle. The dial of the invention has a simple and yet sophisticated look. Furthermore, the dial allows a watchmaker's name to be shown without same significantly impacting the look.
