Abstract (en)

[origin: WO2022214749A1] Connector for rotary electric machine stator, the connector comprising a set of electrical conductors having tabs for connecting to stator winding conductors and/or to a stator power supply bus, each electrical conductor being at least partially surrounded by one or more insulating supports, at least one insulating support bearing at least one anchoring finger projecting along an axis of elongation Y, the anchoring fingers being configured in such a way that it is possible to turn around them in a plane perpendicular to their axis of elongation Y.
