Abstract (en)

[origin: WO2022215097A1] An electric power module (11) for a hybridization system (10) for heat engines is described, which comprises a first electric motor (1) comprising an input shaft (21) connectable to a heat engine (3) to be hybridized, a second electric motor (2) comprising an output shaft (22) connectable to a motion transmission system (4), unidirectional motion transmission means (5) interposed between the two shafts (21, 22) of the electric motors (1, 2) with the aim of guaranteeing the transmission of the torque in one direction only; a system comprising this module and a method of use of this system are also described.
