Abstract (en)

Method for making a headgear (1), preferably a balaclava (100), with double layer, adapted to cover at least in part the head of a person. The method envisages making a knit fabric element (2) as a single piece, of tubular type and of symmetrical shape with respect to an axis of symmetry (Y), orthogonal to its longitudinal development axis (X), and folding said tubular knit fabric element (2) on itself at the axis of symmetry (Y), so as to overlap the symmetrical parts of said tubular knit fabric (2).
