Abstract (en)
The invention relates to a building comprising a main building and a roof construction. The present invention further relates to a roof construction that is mounted to a non-load-bearing façade wall of a main building. According to the invention, the building comprising a main building and a roof construction such as a sun porch, roof, terrace roof, porch, conservatory or veranda, fixedly connected to a façade wall of the main building, wherein the roof construction comprises an outer section projecting from the façade wall of the main building, wherein the roof construction comprises fastening means that fasten the outer section to the main building in an at least partly thermally insulating manner, wherein the roof construction is self-supporting.
