Abstract (en)

The invention provides a squirrel-cage frame radiator comprises a frame (1), which consists of a water inlet pipe (11), a return pipe and radiating pipes (13); a radiating fin (2), which is fixed with the radiating pipes; and a radiating panel (3), which is fixed with the radiating pipes and shields the radiating fin. The water inlet pipe and return pipe are elliptical annular, the water inlet pipe is located at the upper part of return pipe, and the radiating pipes wind around the elliptical annular water inlet pipe and the elliptical annular return pipe and is connected between the opposite sides of the water inlet pipe and the return pipe at intervals. The upper part of the water inlet pipe is equipped with a radiating cover. The radiating fin is formed with radiating fin cavity, and two sides thereof are formed with a radiating fin strip.
