Abstract (en)

A retransmission response feedback method and apparatus. The method comprises: traversing serving cells to determine the HARQ-ACK of an original downlink slot and a delayed downlink slot in each serving cell to which an uplink channel resource needs to feed back (401); respectively obtaining HARQ-ACK information of the original downlink slot and HARQ-ACK information of the delayed downlink slot (402); generating a HARQ-ACK codebook according to the HARQ-ACK information of the original downlink slot and the HARQ-ACK information of the delayed downlink slot (403); and sending the HARQ-ACK codebook by using an uplink channel (404). Using the solution of the present application, effective feedback of SPS PDSCH HARQ-ACK can be ensured.
