Abstract (en)

[origin: WO2022218718A1] The present invention relates to a door handle device (1) for a vehicle door (2) of a motor vehicle (3) with a handle part (4) and with a cleaning device (5) which emits UV-C light (6). In order for it to be possible for a particularly hygienic utilization of the motor vehicle (3) with at the same time a high standard of design to be realised, it is provided that the handle part (4) can be adjusted at least between a retracted non-use position and an extended use position, wherein the cleaning device (5) is configured in such a way that it loads the handle part (4) in its non-use position with UV-C light (6) and cleans it as a result.
