Abstract (en)  
[origin: WO2022218971A1] A lining construction (10) for an oven (40), has a top panel (11), a base panel (12), a rear panel (13), a left side panel (14) and a right side panel (15), constructed from a stone material, such as engineered stone. The top panel (11), base panel (12), rear panel (13), left side panel (14) and right side panel (15) are supported on a structural framework (16) to form a lining cassette (20). The lining cassette (20) can then be engaged with and secured in a housing (32) of a range cooker (30), via mounting brackets (21). A single modular construction of lining cassette (20) can be combined with different sizes and configurations of housing (32) to provide an array of range cookers (30) with different configurations and numbers of ovens (40).
