Abstract (en)
[origin: WO2022219290A1] The present invention relates to a weighing device (1) comprising: - a load cell (2), - a connecting element (3) connected to the load cell (2), and - a weighing platform (4) which is mounted so as to be freely rotatable and translationally connected to the connecting element (3), the weighing platform (4) being suspended from the load cell (2) via the connecting element (3), so that a force exerted by the weighing platform (4) on the connecting element (3) is transmitted to the load cell (2).
