Abstract (en)

[origin: WO2022248171A1] The invention relates to a method for quality assurance of a system, comprising an example-based sub-system. In order to improve the quality assurance of the system, the method involves the example-based sub-system (46) being created and trained on the basis of collected examples (22) that form a set of examples. The quality assurance of the system (1, 40) is carried out based on a procedure model (301) for carrying out a development process representing a plan for proceeding during the quality assurance of the system (1, 40). The quality assurance of the example-based sub-system (46) is carried out based on a quality assessment which is determined based on the set of examples (22).
