Abstract (en)
The invention relates to the slide system, allows the hoisting winch (400) connected to the main boom (200), which provides for lifting of the load in the folding main boom (300) in machines with folding booms or telescopic booms, to be mounted on the machine with folding boom or telescopic boom without the need to shorten the length of the jib boom (500) connected to the end of the folding main boom (300).
