Abstract (en)
A canopy is provided. The canopy comprises a canopy frame having an unfolded state, and the canopy frame comprises a top rod and overhanging rods. The overhanging rods are slidably arranged on the top frame, and each overhanging rod has a retracted position and at least one stretched position when the canopy frame is in the unfolded state. The canopy further comprises locking devices arranged between the top frame and the overhanging rods, and each locking device has a locked state capable of locking one of the overhanging rods in the stretched position and an unlocked state of releasing the overhanging rod, at least when the canopy frame is in the unfolded state. The overhanging rods can be adjusted according to the needs of use after the canopy is unfolded, and is relatively flexible to use.
