Abstract (en)  
[origin: WO2022223302A1] A method for adjusting a drying process in a cleaning appliance that includes a camera (105) for capturing an interior of the cleaning appliance involves a step of reading an image signal (610) via an interface to the camera (105), the image signal (610) representing an image recorded by the camera (105), a step of ascertaining a drop signal (640) using the image signal (610), the drop signal (640) representing a characteristic of drops shown in the image, and a step of providing an adjustment signal (615) for adjusting the drying process using the drop signal (640).
