Abstract (en)

[origin: WO2022187384A1] Apparatus comprising: a flexible sleeve adapted to be slid over the exterior of an endoscope, wherein the endoscope comprises a proximal end and a distal end, and a handle disposed at the proximal end of the endoscope, and wherein the sleeve comprises a proximal end, a distal end and a sleeve lumen extending therebetween, and further wherein the sleeve is configured to be slid over the exterior of the endoscope so as to substantially cover the exterior of the endoscope from a point adjacent to the distal end of the endoscope to a point adjacent to the handle of the endoscope; a balloon secured to the distal end of the sleeve; an inflation/deflation tube carried by the sleeve and in fluid communication with an interior of the balloon; and a pair of push tubes mounted to the sleeve.
