Abstract (en)
[origin: WO2022223764A1] The invention relates to a padded mailing envelope (1) for receiving at least one mail item. The mailing envelope (1) has an opening (2) on at least one side for receiving the item and is formed from at least one outer material blank (3). A padding material layer (7) is arranged on an inner side (5) of an outer material layer (6) of the outer material blank (3), which inner side faces the interior space (4) of the mailing envelope (1). The padding material layer (7) is formed from a paper foam (8). The invention also relates to a method for producing a padded mailing envelope (1).
