Abstract (en)

[origin: WO202223658A1] The invention relates to a prefabricated panel (100) comprising a bottom rail (102), a top rail (104) and a plurality of posts (106) attached between the rails (102, 104), wherein each rail (102, 104) is in the form of a wooden beam with vertical indentations distributed in pairs on either side of a vertical median plane of the beam, wherein each post (106) is in the form of a wooden beam which has at each end two teeth extending vertically and separated by a recess and wherein, for each post (106), the teeth of one end of the post (106) are inserted and attached in the indentations (204) of a single pair of the top rail (104) and the teeth of the other end of the post (106) are inserted and attached in the indentations (204) of the bottom rail (102). Such a prefabricated panel is simple to manufacture and easy to install.
