Abstract (en)
[origin: WO202223294A1] The invention relates to a domestic appliance device (14), in particular a hob device, with a household appliance operating unit (16). In order to provide a generic household appliance device (14) with improved characteristics in terms of convenience, it is proposed that the household appliance operating unit (16) comprises a communication unit (18) which is provided to communicate with at least one external multimedia unit (22), wherein at least one operating command is transmittable from the household appliance operating unit (16) to the multimedia unit (22) by means of the communication unit (18).
