Abstract (en)

[origin: WO2023274678A1] The invention relates to a method and a system (1) for managing keys for secure communication between a plurality of communication subscribers (2, 4, 6). In the method, the secure communication is carried out (C, CC) via a first communication channel (10) between the plurality of communication subscribers (2, 4, 6). Communication for managing keys via a second communication channel (20), which is separate from the first communication channel (10), is carried out (B, BB) between a first communication subscriber (4, 6) of the plurality of communication subscribers, which comprises a client device (14, 16), and a key management server device (22).
