Abstract (en)

[origin: WO202229398A1] The present invention relates to a sweetener composition, comprising a granular starch component and a sugar/sugar alcohol system formed of a non-crystalline phase and a crystalline phase, the non-crystalline phase comprising at least one oligosaccharide-containing syrup, in particular glucose syrup, oligofructose syrup or a mixture thereof, mannitol and sucrose, and the crystalline phase comprising sucrose and mannitol, to a process for preparing same, to the use of the sweetener composition as fondant, in particular bulk confectionery such as dimensionally stable fondant eggs, icing, coating, cream or a filling for bakery products or confectionery, especially chocolate bars, pralines and bars of chocolate, and also to bakery products that are entirely or partially coated with the sweetener composition of the invention.
