Abstract (en)

[origin: WO2022231548A1] Invention relates to software based cutting (osteotomy) measuring navigation system processing radiological screen displays used for detecting bone curve for High Tibial Osteotomy (HTO) in Varus and Valgus deformities occurring in knee joint and customised angle adjustable cut and screw guide (7) obtained by means of modelling the values measured by the navigation and transmission thereof to three-dimensioned printer for use in orthopaedics surgery in medicine sector.
