Abstract (en)

[origin: WO2022228879A1] Disclosed is a method for detaching a core sample (5) from a core drill bit (2) of a core drill (1), comprising the following method steps: detection of an intuitive movement of the core drill (1) by said core drill (1), and initiation of a process of removing the core sample (5) by vibration. A second aspect of the invention relates to a core drill for carrying out the proposed method.
