Abstract (en)  
[origin: WO2022228729A2] The invention relates to a security feature (11) for a valuable document (10), into which markings (19, 20) are introduced by at least one laser beam, having at least one laser-sensitive recording layer (16) which is transparent in the visible spectral range, light-diffracting or light-refracting structures (18) arranged on a first side of the recording layer (16), at least one first marking (19) which is introduced into the at least one recording layer (16) by a laser beam from at least one direction (21, 22) through the light-diffracting or light-refracting structures (18) into the at least one recording layer (16) and is visible when viewed from the same direction (21, 22) from a second side, at least one second marking (20) which is introduced into the at least one recording layer (16, 17) with a laser beam from the second side of the recording layer (16) and is visible when viewed from the first and the second side.
