Abstract (en)

[origin: WO2022263132A1] The invention relates to an installation (1) for producing containers filled with a liquid, and in particular beverage containers (10), comprising at least one transport apparatus (2) that transports containers (10) along a predetermined transport path (P), a filling apparatus (4) that fills the containers (10), a closure apparatus (5) that closes the filled containers, and an inspection apparatus (6) that inspects the filled, closed containers, said inspection apparatus (6) being arranged downstream of the closure apparatus (5) along the transport path, characterised in that the inspection apparatus (6) is suitable and intended for outputting at least one measured value that is characteristic of a composition of the product poured into the containers.
