Abstract (en)

[origin: WO2022229183A1] The invention relates to an adjustment screw (10) for use when installing a wall (20) on an uneven floor surface (30), having a threaded section (11), which has a thread and a length (L) and which is designed to be screwed into the floor surface (30), and a screw head (12), which has a flat contact surface and a width (B) and which is designed to be used as a contact surface for the wall (20). The invention additionally relates to a method for installing a wall (20) on an uneven floor surface (30), having the steps of determining a position of the wall (20) to be installed, leveling the highest point (31) of the floor surface (30), assembling two adjustment screws (10) according to the invention, applying expansive mortar (32) onto the floor surface (30) along the determined position of the wall (20), and placing the wall (20) on the expansive mortar (32) and the adjustment screws (10).
