Abstract (en)

[origin: WO2022229139A1] The invention relates to an actuation element (100) for actuating a clamping spring (211) of a connecting assembly (200), the actuation element (100) comprising a first piece (110) on which a gripping area (113) for actuating the actuation element (100) is formed, and a second piece (111) on which at least one actuation area (114a, 114b) for actuating the clamping spring (211) is formed, the first piece (110) being moved into a pre-locked position along with the second piece (111) before being mounted into the connecting assembly (200).
