Abstract (en)

[origin: WO2022229318A1] Disclosed is a process for manufacturing a plug connector comprising a housing (1) with which contact partners (2) are associated, further comprising at least one electrical conductor that is connected to a contact partner (2) and is surrounded by a cable sheath (4), wherein the conductor along with the cable sheath (4) is guided out of the housing (1), and wherein the contact partner (2) along with the electrical conductor and the cable sheath (4) is inserted into an injection mold, whereupon the housing (1) is manufactured in an overmolding operation.
