Abstract (en)
A hydrogen supply system (100) includes a hydrogen production unit (101) which produces hydrogen, a hydrogen boosting unit (102) which boosts a pressure of the hydrogen produced by the hydrogen production unit (101) to a pressure at which the hydrogen can be supplied to a gas grid, a grid gas lead-in unit (103) which leads grid gas from the gas grid (901), a hydrogen concentration adjustment unit (104) which adjusts a mixed gas to have a hydrogen concentration equal to or lower than an allowable hydrogen concentration specified in the gas grid (901), and a mixed gas return unit (105) which supplies the mixed gas to the gas grid.
