Abstract (en)

[origin: WO2022234104A1] The invention relates to a blowing cleaning machine for shells (100), comprising: - a frame (10), - a rotating plate (20) designed to receive and convey a plurality of shells (100) to be cleaned, - at least one blowing nozzle (30) installed on the rotating plate (20) and designed to clean at least one shell by blowing, - a fixed supply port (40) mounted fixedly on the frame (10), characterized in that the cleaning machine comprises at least one rotating distributor (50) arranged between the fixed port and the at least one blowing nozzle (30), comprising a fixed shaft (51) with a single distribution window (513) designed to supply the at least one blowing nozzle (30) with blowing air only over a predetermined angular blowing sector (Saf).
