Abstract (en)

[origin: WO2022233502A1] The invention relates to a packaging means, a packaging unit, and a method for forming packaging units. The packaging means (10, 30) is used to combine at least two containers (20). At least one form-fitting securing unit is formed between the packaging means and each container. The packaging means (30) consists of at least two sub-regions (31) which are connected together and on each of which at least one securing element (33) is formed for fixing a respective container (20). Each sub-region (31) can be in a first configuration (K1) and in a second configuration (K2), wherein a respective container (20) can be fixed to the sub-region (31) of the packaging means (10, 30) in the first configuration (K1), and no fixation is produced to a container (20) in the second configuration (K2). Each sub-region (31) can be converted from the first configuration (K1) into the second configuration (K2) by applying pressure from above.
