Abstract (en)
According to an example aspect of the present invention, there is provided a method for producing a board (3) comprising wood material and a coating of hot melt glue, wherein the hot-melt glue is spread on the surface the of the board (3) by a rotating applicator roller (2) so that the film layer applied on the surface of the board (3) is split between the rotating applicator roller (2) and the surface of the board (3) to form random protrusion on the coating..
