Abstract (en)
[origin: WO2022238817A1] The invention relates to a foldable case comprising a shell-like body that delimits an inner housing space provided with an insertion and removal opening, a closing lid provided with activable and deactivable members for fixing to the shell-like body of said lid at least in said closed position, which shell-like body has a polygonal-based solid form in use and is obtained from a substantially flat die-cut body.
