Abstract (en)

[origin: CA3218197A1] The present invention relates to a composition comprising: - at least one molecule covalently conjugated to a polylysine, and - at least one hydrophobic molecule which cannot be covalently conjugated to a polylysine, said molecule being encapsulated in a micelle, and/or at least one molecule conjugated to a polylysine by polymerisation, said molecule and the polylysine forming a copolymer. The subject matter of the invention is also the method for producing said composition and/or the uses thereof.
