Abstract (en)

[origin: CA3219399A1] The invention relates to a hollow-fibre membrane filter for purifying liquids, said membrane filter having improved separation properties and comprising: a cylindrical housing; first inflow or outflow chambers and second inflow or outflow chambers surrounding a first and a second end portion, respectively, of the cylindrical housing, the cylindrical housing being designed in at least one end region so as to improve the inflow of a liquid to the hollow-fibre membranes inside the cylindrical housing.
