Abstract (en)
[origin: WO2022238090A1] A process for separating material mixtures, in particular mineral material mixtures, comprises at least the following steps: admitting a liquid, preferably water, into a separating pool; introducing the material mixture into the separating pool to at least partially bring the material mixture into contact with the liquid; raising at least a subamount of the material mixture with a loading container; and releasing the subamount into the separating pool.
