Abstract (en)

[origin: WO202237929A1] The invention relates to an actuation device (1) for actuating two clutches (2, 3), comprising a first selector fork (4), which can be adjusted in a first direction of actuation for actuating a first clutch (2) against a first restoring force, and a second selector fork (5) which can be adjusted in a second direction of actuation for actuating a second clutch (3) against a second restoring force, the first actuation device and the second actuation device being oriented in an opposed manner to each other. Furthermore, the invention relates to a hybrid transmission (17) and to a dual-clutch transmission (21) comprising the actuation device (1).
