Abstract (en)

[origin: WO2022241373A1] Various aspects of the present disclosure generally relate to wireless communication. In some aspects, a user equipment (UE) may receive system information that indicates whether one or more neighbor cells support access by UEs in a reduced capability category. The UE may perform one or more radio resource management measurements on one or more neighbor cells that are identified as supporting access by UEs in the RedCap category based at least in part on the system information. Numerous other aspects are described.
