Abstract (en)

[origin: WO2022242804A1] The invention relates to a device (1) for grooming animals, in particular domestic cats, having a main body (2), a grooming element (3) rotatably connected to the main body (2) and a drive motor (11) for rotating the grooming element (3) relative to the main body (2). In order to make automatic operation and especially gentle grooming possible, a sensor device (13) is provided which is designed to rotate the grooming element (3) by means of the drive motor (11) when an animal (8) is detected.
