Abstract (en)

[origin: WO2022245224A1] Fish transfer vacuum hose assembly comprising a vacuum hose (11) comprising a first and outer hose element (11a) arranged to at least partly cover a second and inner hose element (11b) exhibiting a distal end (11c) when the vacuum hose (11) is in an inoperative position. The fish transfer vacuum hose assembly is preferably arranged below deck on a boat and it comprises a drive mechanism arranged to move the inner hose element (11b) at least partially out of the outer hose element (11a) to bring the vacuum hose (11) into an operative position. The drive mechanism may comprise at least one of a pitch rack, a traction unit, winches or a hydraulic mechanism.
