Abstract (en)
[origin: WO2022243189A1] The present invention is directed to a biocidal composition for the surface treatment of a porous substrate, the composition comprising at least one hydrophilic binder, at least one quaternary ammonium-based biocidal compound and at least one cationic sizing agent. The invention further relates to the use of such a composition for imparting biocidal, in particular antiviral, properties to a porous substrate.
