Abstract (en)
[origin: WO2022243138A1] The invention relates to a display workstation furniture item (1) comprising a work unit (2) which has a box-like body having at least one work top (21). The aim of the invention is to achieve a multi-station, user-friendly display workstation. According to the invention, this is achieved in that: the work unit (2) is accommodated on a frame part (10) with at least one column (3) by means of a tilting mechanism (8) so that said work unit can be tilted from a space-saving parking position (B) into a working position (A), which column is mounted on a foot unit (4) and supported by said foot unit with respect to the floor; and the work unit (2) is provided with an upper cover plate (20) which is upwardly spaced apart from the work top (21) and which, when in the working position (A), can be moved from a closed position (C) into an open position (D), and on whose lower face, which faces downward in the closed position (C), a screen (50) is arranged, and, in the open position (D), the visible surface of said screen faces the field of vision of the person working at the workstation.
