Abstract (en)

[origin: WO2022243821A1] A machine (8) of the roller milling type is described, for grinding food products, in particular grains, the machine comprising a motor (9) fitted to one of the grinding rollers (10). Said motor (9) is liquid-cooled. Another motor (11) is also provided, directly fitted to the distribution roller. The coolant is water or an aqueous solution, chosen from a solution of water and ethanol or a solution of ethylene glycol. A method is also described, for producing a particular embodiment of the machine (8).
