Abstract (en)

[origin: WO2022246055A1] A method of filling a vial. The method includes providing a pump corresponding to a vial and setting a drip retraction parameter for the pump to any value equal to or less than 20 degrees. The method also includes setting a no adjustment limit for a fill weight of the vial to T1, with T1 being at or in a range of about 2% more or less than a fill weight of a target fill weight T0, wherein a process performance index Cpk (Cpk) for the vial throughout a fill cycle exceeds a minimum value.
