Abstract (en)

[origin: WO2024068181A1] The invention relates to an inductor (ID0) having at least one core (CRE), wherein the core (CRE) has an at least partially concave shape and at least partially encloses a volume of space (CVT), and the inductor has current terminals (TRM). In order to increase power density, according to the invention, at least some of the current terminals (TRM) are at least partially arranged in the volume of space (CVT).

Abstract (de)

Die Erfindung betrifft eine Induktivität (ID0) mit mindestens einem Kern (CRE), wobei der Kern (CRE) mit einer zumindest abschnittweisen konkaven Form ein Raumvolumen (CVT) zumindest teilweise umschließt, wobei die Induktivität Stromanschlüsse (TRM) aufweist. Zur Erhöhung der Leistungsdichte wird vorgeschlagen, dass zumindest einige der Stromanschlüsse (TRM) zumindest teilweise in dem Raumvolumen (CVT) angeordnet sind.
