Abstract (de)
Die Erfindung betrifft Partikel zur Anreicherung von biologischem Material, wobei oligomere und/oder polymere Uronsäuren an die Partikel gebunden sind. Ferner betrifft die Erfindung die Verwendung der Partikel zur Anreicherung von biologischem Material sowie ein Verfahren zur Herstellung der Partikel. Die Erfindung weist insbesondere dahingehend Vorteile auf, dass die Anreicherung von biologischem Material im neutralen oder schwach saurem Milieu erfolgen kann als auch dahingehend, dass auf die Zugabe von zwei- oder mehrwertigen Metallkationen verzichtet wird.
