Abstract (en)

A lock assembly includes a lock, a pre-loadable mount and an adjusting element. The lock includes a shell formed with two bores and a hole. The pre-loadable mount includes a yoke, two bent rods extending from the yoke, and two pivots respectively extending from the bent rods, wherein the pivots are respectively inserted in the bores. The adjusting element includes a first section inserted in the hole and a second section placed against the yoke so that the bent rods are located against a rear face of the door while a portion of the shell is placed against a front face of the door.
