Abstract (en)

A method for controlling an electric fuel pump is provided, including: acquiring control parameters of an electric fuel pump (410) in a case that a power-on event has been monitored (S110); and in response to the control parameters including a fuel-tank fuel amount and an accumulated mileage, determining, according to at least one of the fuel-tank fuel amount and the accumulated mileage, whether to control the electric fuel pump to work (S120). An apparatus for controlling an electric fuel pump, an electronic device, and a computer-readable storage medium are further disclosed.
