Abstract (en)
A heat exchange tube package in which the tubes are arranged parallel to one another, is characterised in that at least some of the tubes (2) are bulged at one of their ends, where the rim (2a) of the bulged end of the tube (2) is in a shape other than circular, and where the tubes (2) are arranged in the package (1) according to a pre-set pattern and the rims of the ends of all tubes (2) on both sides of the package are permanently connected to one another. Preferably, the rim (2a) of the bulged end of each tube (2) in the package (1) is in the shape of a regular hexagon or equilateral triangle or square with concave sides, or its shape is convex and concave. Preferably, the rims 2a of the tubes (2) are connected to one another with a weld.
