Abstract (en)  
The self-adhesive nameplate (1) is intended, in particular, for funerary objects such as cinerary urns, memorial vases and the like, and comprises a main body (2) which defines in order from the outside to the inside: a frame (3) surrounding a window (30); a housing pocket (4), of similar shape and having dimensions equal to or slightly greater than those of said window (30); a support plate (5), intended to constitute the bottom of the aforementioned housing pocket (4). The window (30) is closed to the outside by a transparent slab (6), inserted into said housing pocket (4). A foldable portion (50) is made in the support plate (5), that can be folded to uncover an inlet port (40) of said housing pocket (4), for inserting, in said housing pocket, a customised sheet (7) containing images, including photographic images, drawings and/or short texts. The same foldable portion (50) is then locked in a closed position by adhesive means (51). Once completed with the customised sheet (7), the nameplate (1) can be permanently attached to one of said funeral containers by means of an adhesive layer (8) associated with the rear face of said support plate (5). The nameplate (1) has good flexibility so that it can also be adapted to surfaces with a moderately curved or convex shape.
