Abstract (en)
[origin: WO2022248553A1] The invention relates to a method for producing individual aerosol- generating articles each comprising an individual substrate section, the substrate section comprising aerosol-forming substrate (12A) with a susceptor element, the method comprising the method steps of: • A) providing a continuous band of susceptor material (16A), • B) partially cutting the continuous band of susceptor material at a predetermined precut position to produce a partially cut band of susceptor material (16B), • C) producing the aerosol-generating articles employing the partially cut band of susceptor material, wherein the precut position separates individual aerosol-generating articles from each other.
